

Simultaneous dispenser Accutinter 750 [AT750]

PRODUCT INFORMATION

- DVX piston pump technology
- Flowrate 0.5 - 1.0L/min
- Max. capacity of 32 channels
- Various canister modules (3-20L)
- Automatic nozzle closure
- Automatic cantable

The Accutinter 750 is the next generation of simultaneous volumetric dispensers for locations with high output requirements as seen in large retail environments and service centers. The Accutinter 750 uses the patented DVX technology, assuring an immediate simultaneous dispense and allowing a fast and accurate output at all times.

The Accutinter 750 can contain up to 32 channels and can be equipped with a manual or electric cantable. Canisters of 3, 6, 10 and 20 liter are available in various modules that can be combined freely. Standard flowrate of the stainless steel pumps are 0.5L/minute, but it is possible to upgrade the dispenser with pumps of 1.0L/minute, while remaining the accuracy of 1/384 fl.oz. (colorant depending).

When high output is required, the Accutinter 750 will provide you with the highest value of ownership during the lifetime of the dispenser.
